

## Public Health Focused Internship Opportunities

<i>Public Health Internship</i>	
<b>Job Title</b>	HIV and Sexual Health Intern
<b>Internship Focus</b>	Public Health
<b>Community Partner</b>	Masaya Sin Fronteras (MASINFA)
<b>Location</b>	Masaya, Nicaragua
<b>Partner Profile</b>	<p>MASINFA strives to promote sustainable development through education, health care, sound agriculture, and civic participation. MASINFA provides technological, practical education to low-income residents of Masaya and offers health care and education through prevention programs. MASINFA works to conserve the environment through the facilitation of sustainable practices in agriculture and increasing food security. They also provide small loans and promote housing development and community involvement.</p> <p>MASINFA is composed of three main areas:</p> <ol style="list-style-type: none"> <li>1. A technical continuation school (NAMBUE)</li> <li>2. A cancer prevention and healthcare center (Programa Salud – CIPO)</li> <li>3. A housing and local development arm that elaborates home construction and infrastructure projects (Programa Desarrollo Local Sostenible -DLS) incorporating microfinance</li> </ol> <p>An overarching objective of the organization’s upcoming Strategic Plan is to emphasize the importance of proper nutrition and physical activity for long-term health and disease prevention through a multidisciplinary approach, targeting the youth population, pregnant women, and parents.</p>
<b>Internship Description</b>	<p>The Centro de Investigacion y Prevencion Oncologica (CIPO) primary objective is the prevention of Uteran and Breast Cancer, though the clinic also offers: general consults, gynecological consults, pap smears, mammograms, minor breast and vaginal surgeries, ultrasounds, pregnancy prevention, and biopsy. The clinic is always in need of, in fact depends on, interns to build capacity in the form of new techniques for messaging, engaging, and evaluating of existing activities, which include the following:</p> <ul style="list-style-type: none"> <li>● Forums, workshops, health fairs at the departmental and national level in conjunction with the Nicaraguan AIDS Commission (CONISIDA)</li> <li>● HIV prevention</li> <li>● Distribution of/education about contraceptive methods</li> <li>● Youth counsel and education regarding topics of reproductive health, STIs and STDs, Teen pregnancy, self-care and general health, promotion of health amongst peers</li> <li>● House to house visits – urban and rural – throughout various municipalities to distribute educational materials on the topic of health</li> </ul>

<i>Public Health Internship</i>	
<b>Job Title</b>	Health and Nutrition Intern
<b>Internship Focus</b>	Public Health
<b>Community Partner</b>	Masaya Sin Fronteras (MASINFA)

<b>Location</b>	Masaya, Nicaragua
<b>Partner Profile</b>	<p>MASINFA strives to promote sustainable development through education, health care, sound agriculture, and civic participation. MASINFA provides technological, practical education to low-income residents of Masaya and offers health care and education through prevention programs. MASINFA works to conserve the environment through the facilitation of sustainable practices in agriculture and increasing food security. They also provide small loans and promote housing development and community involvement.</p> <p>MASINFA is composed of three main areas:</p> <ol style="list-style-type: none"> <li>1. <b>Internship Description</b>	The health clinic run by MASINFA (CIPO) is currently aiming to further build on the awareness generated through their work by engaging the resources and beneficiaries of the health clinic (CIPO) to deliver the values of proper nutrition at all stages of healthcare delivery to the adult population. A Public Health/Nutrition Intern would have an opportunity to research and learn about issues regarding nutrition in Nicaragua, and work with the nurses and physicians to design public health campaigns that will directly benefit the citizens living in Masaya, Nicaragua.

<i>Public Health Internship</i>	
<b>Job Title</b>	Health Education Intern
<b>Internship Focus</b>	Public Health
<b>Community Partner</b>	Centro de Salud Monimbo
<b>Location</b>	Masaya, Nicaragua
<b>Partner Profile</b>	<p>The Health Center in Monimbo works to improve the quality of life of individuals by providing general medical services and health education with a focus on women and children’s health. All services are free or low-cost so that they are easily accessible. Centro de Salud Monimbo strives to lead, organize, coordinate, and regulate health care, assuring patient access and providing clinic visitors with choices and information to improve their life and promote healthy practices. The health center also focuses on disease and infection prevention, direct medical attention, and rehabilitation.</p> <p>To access their target population, CS Monimbo runs educational programs and community development projects, and provide services that are intra-institutional and multifaceted, focusing attention on vulnerable groups.</p>
<b>Internship Description</b>	<p>Under the new Director, the Centro de Salud Monimbo is focusing on a family and community model with an emphasis on preventative care and education implemented within the community rather than at the center itself. The ideology behind this model is to involve the community at a greater level and with greater coverage and the center would continue to offer laboratory services, specialty services, and emergency care. A current campaign under this new model is focused on fighting epidemic and infectious diseases, specifically Dengue, Chikungunya, and Zika.</p> <p>CS Monimbo is looking for a Health Education Intern that would be able to support these efforts through project work utilizing:</p>

	<ul style="list-style-type: none"> <li>● <i>Charlas</i> (group discussions/informal education session) with community members discussing methods for in-home vector control, including a campaign focused on keeping the home clean and sanitary. Physicians and volunteers currently spend Sundays taking these messages door to door throughout the Department.</li> <li>● Health Fairs</li> </ul>

<i>Public Health Internship</i>	
<b>Job Title</b>	Health Promotion Intern
<b>Internship Focus</b>	Public Health
<b>Community Partner</b>	Centro de Salud Monimbo
<b>Location</b>	Masaya, Nicaragua
<b>Partner Profile</b>	<p>The Health Center in Monimbo works to improve the quality of life of individuals by providing general medical services and health education with a focus on women and children's health. All services are free or low-cost so that they are easily accessible. Centro de Salud Monimbo strives to lead, organize, coordinate, and regulate health care, assuring patient access and providing clinic visitors with choices and information to improve their life and promote healthy practices. The health center also focuses on disease and infection prevention, direct medical attention, and rehabilitation.</p> <p>To access their target population, CS Monimbo runs educational programs and community development projects, and provide services that are intra-institutional and multifaceted, focusing attention on vulnerable groups.</p>
<b>Internship Description</b>	<p>In addition to its medical services, CS Monimbo integrates educational workshops into its daily schedule, and its health workers travel to the five rural outposts (puestos de salud) in Masaya to educate communities on thematic topics and to undertake vaccination campaigns. CS Monimbo is seeking a Health Promotion Intern to assist the staff in designing and executing current health campaigns which include:</p> <ul style="list-style-type: none"> <li>● Promotion of and education about breastfeeding: a highly visible national campaign that has been in place since 2005 and extends to every health center and clinic</li> <li>● Cervical cancer prevention, awareness, and treatment: drop-in pap smear exams are offered daily; although, so far the high incidence and death rates have not dropped</li> <li>● Diarrhea, dehydration, and dengue fever prevention</li> <li>● Tuberculosis screenings and care</li> <li>● HIV/AIDS and STD testing and referrals</li> </ul>

<i>Health Research Internship</i>	
<b>Job Title</b>	Health Research Intern
<b>Internship Focus</b>	Public Health
<b>Community Partner</b>	Centro de Salud Monimbo
<b>Location</b>	Masaya, Nicaragua
<b>Partner Profile</b>	<p>The Health Center in Monimbo works to improve the quality of life of individuals by providing general medical services and health education with a focus on women and children's health. All services are free or low-cost so that they are easily accessible. Centro de Salud Monimbo strives to lead, organize, coordinate, and regulate health care, assuring patient access and providing clinic visitors with choices and information to improve their life and promote healthy practices. The health center also focuses on disease and infection prevention, direct medical attention, and rehabilitation.</p> <p>To access their target population, CS Monimbo runs educational programs and community development projects, and provide services that are intra-institutional and multifaceted, focusing attention on vulnerable groups.</p>

<b>Internship Description</b>	With limited staff and resources, CS Monimbo has not been able to effectively research the human behaviors surrounding risky health practices, or understand in which regions infections and diseases are most prevalent. Because of this, CS Monimbo is looking for a Health Research Intern to develop assessment tools, update current health data and data storage systems; research, assess, and analyze current needs, conditions, and risk factors. At the culmination of the internship, the Health Research Intern will present their findings to the health center and help them strategize methods of mitigation.

<i>Public Health Internship</i>	
<b>Job Title</b>	Health and Nutrition Intern
<b>Internship Focus</b>	Public Health / Disabilities
<b>Community Partner</b>	Asociación de Padres de Familia con Hijos con Discapacidad (Los Pipitos)
<b>Location</b>	Ciudad Sandino, Nicaragua
<b>Partner Profile</b>	Los Pipitos is an association of parents and relatives of children, adolescents, and young people with impairments or disabilities. It seeks alternatives to bring their children forward, procure socio-emotional educational attention, recognition as subjects of law; and under this perspective, to promote changes in society so that children with disabilities are respected and able to exercise their human rights. Our aim is to empower families to have a social impact in order to achieve a better quality of life for their children.
<b>Internship Description</b>	Pipitos seeks an intern to support the promotion of healthy lifestyles from food, using foods that are available to the population of the municipality with support from the Learning Center for Life (CAV) of Ciudad Sandino. Desired skills and experience include knowledge of nutrition, with an emphasis on nutrition and deficiency and/or disability; knowledge of disabilities and respect for the human rights of persons with disabilities; respect for different cultures; and basic command of Spanish.

<i>Public Health Internship</i>	
<b>Job Title</b>	Public Health Intern
<b>Internship Focus</b>	Public Health
<b>Community Partner</b>	Community Transformation Foundation Network (COTFONE)
<b>Location</b>	Masaka, Uganda
<b>Partner Profile</b>	COTFONE is a registered charity that focuses on improving the lives of marginalized populations targeting orphaned and vulnerable children (OVCs) below the age of 17 in the Masaka district. By developing community-based initiatives, this organization works to address the basic unmet needs of underprivileged children & their families.
<b>Internship Description</b>	COTFONE school is seeking to expand their school clinic. This clinic is still its preliminary stages but hopes to not only reach the children at school, but also the surrounding community affected by HIV/AIDS. In partnership with the school, the intern will help construct a health education program for the clinic.  Duties will include: Conducting community assent of public health issues; Designing clinic/health development plan; Facilitating in research of information; Helping with outreach in public health in the community by conducting surveys; Conducting/assisting in sensitivity trainings in health and basic nutrition for the school and community; Developing peer education for reproductive health and HIV/AIDS prevention

<i>Public Health Internship</i>	
<b>Job Title</b>	Community Health Intern
<b>Internship Focus</b>	Public Health
<b>Community Partner</b>	Community Transformation Foundation Network (COTFONE)

<b>Location</b>	Masaka, Uganda
<b>Partner Profile</b>	COTFONE is a registered charity that focuses on improving the lives of marginalized populations targeting orphaned and vulnerable children (OVCs) below the age of 17 in the Masaka district. By developing community-based initiatives, this organization works to address the basic unmet needs of underprivileged children & their families.
<b>Internship Description</b>	COTFONE is seeking an intern that will have an active and meaningful participation of the target communities in promoting their own health. This intern will identify community-based prevention programs that can improve basic health care and lower its costs. Additionally, the intern will strive to raise public awareness and building leadership capacities by organizing trainings for OVCs and marginalized groups focused on their needs; as well as for people holding leadership positions to enable them to develop capacities of influencing pro-poor decisions.

<i>Public Health Internship</i>	
<b>Job Title</b>	Public Health Intern
<b>Internship Focus</b>	Public Health, Youth & Education
<b>Community Partner</b>	Step Up Primary School
<b>Location</b>	Masaka, Uganda
<b>Partner Profile</b>	Step Up Primary School offers educational opportunities for local children including orphans and vulnerable children. They emphasize teaching children according to their ability and customizing curriculum. Step Up's mission is to offer quality education to all learners.
<b>Internship Description</b>	Step Up would like to develop and support programs that provide a healthy living environment for our students. We would like to focus on general health, girls health and menstruation, and the psychological health of our students.  Intern responsibilities will include facilitating trainings for teaching staff in first aid and public health; continuing existing girls health and menstruation programs; and supporting a healthy learning environment.

<i>Public Health Internship</i>	
<b>Job Title</b>	Community Health Intern
<b>Internship Focus</b>	Public Health
<b>Community Partner</b>	Emusanda Health Center
<b>Location</b>	Kakamega, Kenya
<b>Partner Profile</b>	Emusanda strives to empower the community to understand their health, and provides quality health services throughout the region. Emusanda is a dispensary (level II) owned by Kenya's Ministry of Health. It currently offers a wide variety of health services and outreach programs, and is continuing to expand.
<b>Internship Description</b>	Emusanda is seeking an intern passionate about community health, particularly with regards to the prevention and treatment of HIV. Due to the stigma of living with a positive status, many individuals continue to resist being tested, to their own detriment. The intern will be encouraged to take charge and bring new ideas for how to reach out into the community, as well as activities for support groups to undertake to help improve quality of life and empower those currently living with HIV.

<i>Public Health Internship</i>	
<b>Job Title</b>	Child Development Intern
<b>Internship Focus</b>	Child Development and Health
<b>Community Partner</b>	Mahiakalo Child Development Centre (CDC)

<b>Location</b>	Kakamega, Kenya
<b>Partner Profile</b>	Mahiakalo CDC is committed to advocate for children by facilitating holistic development through support & mentorship to enable them attain self-reliance and execute Christian virtue.
<b>Internship Description</b>	Mahiakalo is seeking a creative problem solver for an internship working in their Child Development Centre, with children aged 3 up to 21. At its most basic level, all activities of this internship would be for the educational, social, and eventually professional development of these underserved children. The Centre has a number of programs in place, and a number that could be grown further, including mentorships, fundraising, skills development and basic business training, as well as the provision of basic health care.

<i>Public Health Internship</i>	
<b>Job Title</b>	Public Health Intern
<b>Internship Focus</b>	Public Health
<b>Community Partner</b>	African Canadian Continuing Education Society (ACCES)
<b>Location</b>	Kakamega, Kenya
<b>Partner Profile</b>	ACCES's mission is to help the youth in Western Province obtain the education and skills necessary to benefit both themselves and their communities. Through the provision of scholarships, implementation of microfinance programs and breaking down of gender disparities, ACCES strives to improve the situation of young adults in Western Kenya.
<b>Internship Description</b>	This internship will focus on a debilitating disease called "jiggers," which is especially prevalent for disadvantaged populations in rural areas. This is a relatively new initiative for ACCES to prevent and treat this illness using sustainable methods and community sensitization. The internship will include community outreach, education/training, and empowerment, with the aims of alleviating the poverty in the area.

<i>Public Health Internship</i>	
<b>Job Title</b>	Public Health Relations Intern
<b>Internship Focus</b>	Public Health
<b>Community Partner</b>	Western Organization of People Living with HIV / Ambassadors of Hope (WOPLAH)
<b>Location</b>	Kakamega, Kenya
<b>Partner Profile</b>	WOPLAH is a grassroots organization whose mission is to create good will for the most vulnerable children, families, and the community at large. WOPLAH envisions a society of health equity, in which all people can realize their full potential to enhance their lives.
<b>Internship Description</b>	WOPLAH is looking for a public health relation intern in an HIV-related field. We seek to have an intern with a background of public health terms (e.g., ART, ARV, MACK, etc.) to use when working with WOPLAH. Additionally, we hope this intern is able to connect their knowledge of public health to engaging the community on how to live positively through the generation of a sustainable project that is chosen by the intern once they arrive.  The ideal candidate will have experience in data collection; needs assessments; computer skills; public relations skills; an open mind; an ability to adapt; and an innovative nature.

<i>Health Research Internship</i>	
<b>Job Title</b>	Sexual Health Research Intern
<b>Internship Focus</b>	Public Health, Health Research
<b>Community Partner</b>	Association of Nicaraguan Women "Luisa Amanda Espinoza" (AMNLAE)

<b>Location</b>	Tola, Nicaragua
<b>Partner Profile</b>	The Association of Nicaraguan Women "Luisa Amanda Espinoza" (AMNLAE) was formed in Rivas in 1977 as an answer to the demands of women participating in bringing down the Somoza dictatorship. Besides the main "Sonia Bello" county House, they have 6 other municipal Houses in an equal number of municipalities. These provide spaces for meetings, trainings, and education of the women and adolescents of Rivas. They are places where women come seeking medical care, legal advice, and therapeutic support. They are also places for learning technical skills in order to contribute to economic empowerment and development. The organization's current strategies include economic rights, political rights and social rights for women and youth.
<b>Internship Description</b>	The organization seeks to address the social issue of sexual health and reproductive rights as part of their comprehensive health program. They are looking for one or multiple interns to undertake a research project that would enable them to understand better the factors that relate to lack of access and information on sexual health and reproductive rights. They would use the data collected from the investigation to buttress their proposal writing, to aid communities in understanding where to concentrate their efforts, to support arguments for a national strategy on reproductive rights, and to share information with relevant institutions.

<i>Public Health Internship</i>	
<b>Job Title</b>	Health Evaluation Intern
<b>Internship Focus</b>	Public Health
<b>Community Partner</b>	Fundación Nutrir
<b>Location</b>	Salta, Argentina
<b>Partner Profile</b>	Fundación Nutrir Salta is an integrated social center ensuring the care of at-risk children and their families in all aspects of their lives. Specifically, the foundation combats infant malnutrition by supplying food and educating families on proper preparation; building positive home environments, creating dignity and self-esteem in mothers; providing workshops to mothers and a community garden to children; emphasizing knowledge transfer between generations; and providing spiritual guidance.
<b>Internship Description</b>	<p>Through its programs, Fundación Nutrir supports at-risk children and their families by combating infant malnutrition and building positive home environments. Currently, Fundación Nutrir is seeking an intern who has experience in or is willing to learn general medicine. Interns will have the opportunity to gain field experience in nutritional disorders in infants and the introduction of therapeutic measures. Additionally the intern will help support Fundación Nutrir in monitoring their current programs and support in data analysis, customer care, and administration at the headquarters in Salta, Argentina.</p> <p>The intern's responsibilities would include performing child care visits for the first consultation, analyzing the criteria for inpatient admission, and determining the child's income for the program.</p>

<i>Public Health Internship</i>	
<b>Job Title</b>	Advocacy Intern
<b>Internship Focus</b>	HIV/AIDS Public Health
<b>Community Partner</b>	Vivo en Positivo
<b>Location</b>	Cochabamba, Bolivia
<b>Partner Profile</b>	Vivo en Positivo exists to contribute to the overall health, generating empowerment of girls, boys, women and men with HIV or AIDS, promoting the defense of human rights and raising awareness to the community with a comprehensive approach to HIV and AIDS, in Cochabamba with regional and national projection. Vivo en Positivo works with persons with HIV; sex workers; the gay, bisexual, trans, and transvestite population.
<b>Internship</b>	The intern will focus on advocacy for people with HIV/AIDS, sex workers, and the promotion of

<b>Description</b>	<p>equality for all lifestyles. This position requires a dynamic person that is willing to work with many different actors at once. This could include working on or creating awareness campaigns, collaborating with other NGOs, or working on petitions to the government.</p> <p>This position will require the intern to work in the office, but also to spend a great deal of time outside working with and collaborating with other institutions and people. Intern must be independent and self-motivated.</p>
--------------------	---

<i>Public Health Internship</i>	
<b>Job Title</b>	Health/Community Outreach Intern
<b>Internship Focus</b>	Public Health
<b>Community Partner</b>	Casa de los Niños
<b>Location</b>	Cochabamba, Bolivia
<b>Partner Profile</b>	<p>The Casa de los Niños was established in 2008 and is essentially a small, self-contained community with 90 families. Its mission is to assist, support, and provide education to children with disadvantages who might otherwise be abandoned due to economic or family circumstance by providing support to their families through housing, job support, and a welcoming community, etc. Among the 90 families more than 15 of them have a father or a mother with HIV, and there are also 15 children with HIV. A large number of children in the community also deal with severe physical disabilities or chronic medical conditions. There is also a school within the community where about 140 attend, 90% of them being from the community and 10% coming from outside. It is essentially a small, self-contained community that seeks to provide support in any number of ways to its community members.</p>
<b>Internship Description</b>	<p>This intern will work on improving the health program at the Casa. There are a limited number of doctors, nurses, social workers, and psychologists working at the organization. The intern's role is to assist them and help them realize projects they have been working on or would like to create. They may ask the intern to evaluate community needs and develop a project with them.</p> <p>Activities could include creating awareness campaigns, new methods for outreach, improved health protocols, etc. Depending on what the intern would like to work on, they should have corresponding knowledge. For example, if the intern would like to work closely with the nurses, knowledge of nursing would be extremely useful.</p>

<i>Public Health Internship</i>	
<b>Job Title</b>	Health Intern
<b>Internship Focus</b>	Public Health
<b>Community Partner</b>	Mano a Mano
<b>Location</b>	Cochabamba, Bolivia
<b>Partner Profile</b>	<p>Mano a Mano's mission is to improve the quality of life of the poor in Bolivia by providing health and social development support while respecting culture, religion, social class, and the environment found in its communities. The organization promotes the integration and shared responsibility of private and public institutions and the community to ensure the sustainability of each project. Mano a Mano supports communities by constructing health centers and educational infrastructure, and improving road conditions in rural areas. They also work to ensure a sustainable level of donations of medical supplies to health and social service institutions in marginalized areas of Bolivia. Complementary to these activities, Mano a Mano has developed permanent education, health training and human development programs for staff and the communities it serves.</p>
<b>Internship Description</b>	<p>The Health Intern will focus on working with the health clinics supported by Mano a Mano. This placement is ideal for those with a background in nursing. For those looking to work with public health, there are opportunities for health campaigns within communities. Intern must be willing</p>

	to spend majority of time in rural communities.
--	---

<i>Public Health Internship</i>	
<b>Job Title</b>	Public Health Intern
<b>Internship Focus</b>	Public Health
<b>Community Partner</b>	Clinica Anzaldo
<b>Location</b>	Cochabamba, Bolivia
<b>Partner Profile</b>	La Clínica Jesus María is a small children’s health clinic in the rural town of Anzaldo. It serves the child population in the Municipality of Anzaldo, specifically addressing the issue of malnourishment. The Clinic makes routine visits to local communities to make health checkups; those children with health issues are then brought Anzaldo Hospital for a diagnostic and are then taken to the Jesus María Clínica where they are given the services needed for recovery. The clínica also provides meals and serves as a shelter for those less fortunate children in the Anzaldo Municipality. In addition to serving the malnourished children, the clínica also provides workshops for mothers, in order to give them the nutritional tools to properly provide for their children.
<b>Internship Description</b>	The Public Health Intern will work at the clinic elaborating/improving health initiatives within the community. This may include initiating health campaigns, hosting health fairs, or creating support/informational groups. The intern will live in the rural community of Anzaldo, about 2 hours outside of Cochabamba. Intern must be willing to live in a rural setting, with occasional visits into urban Cochabamba. Intern must have background in public health and be extremely independent.

<i>Public Health Internship</i>	
<b>Job Title</b>	Nursing Intern
<b>Internship Focus</b>	Public Health
<b>Community Partner</b>	Clinica Anzaldo
<b>Location</b>	Cochabamba, Bolivia
<b>Partner Profile</b>	La Clínica Jesus María is a small children’s health clinic in the rural town of Anzaldo.
